Consistently Providing Reliable and Sustainable
Supply Chain Partnerships Since 1981

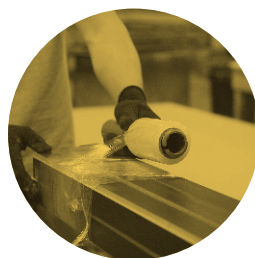

Est. 1981
INNOVATION • SUSTAINABILITY • SERVICE

Mission Statement

To care for our customers and staff in an honest and open way through continual investment in the manufacture and supply of innovative, market leading and value for money products, utilising safe, energy efficient and morally sound practices whilst maintaining our integrity and demonstrating our core values within a changing business environment.

Achieved by:

Reliability

- Offering an unrivalled level of customer care and service
- Meeting the requirements of our customers, by ensuring that every inquiry, order or request for assistance is recorded and dealt with effectively
- Enhanced stock availability to reduce lead times
- Aim to get it right first time, every time

Honesty

- In all our dealings, honour promises given
- An open, straightforward approach
- Respond immediately to all customer complaints and take positive corrective action
- Instil trust into our clients and suppliers

Innovative

- Developing new initiatives for achieving customer satisfaction
- Provide innovative and sustainable solutions to add value to our customers and suppliers
- Understand and satisfy our customers' needs by actively seeking their views, devoting time and energy to their requirements

Passion

- About our products, meticulous attention to detail from our enthusiastic team
- Be prepared to go the extra mile
- Always maintain a positive 'can-do' attitude
- Unequalled team enthusiasm and focus

“

We appreciate the way you work so well with our purchasing team and our depots throughout the country. Your range of products helps reduce the number of suppliers we have.

Senior Purchasing Manager, Midlands

”

who are we?

Consistently providing reliable and sustainable supply chain partnerships since being founded in Greater Manchester in 1981. Davis & Moore has continually forged ahead, often through difficult market conditions, to become recognised as the UK's premier manufacturer and distributor of cleaning rags & wipers, wet wipes, janitorial supplies and packaging solutions.

Our **flexible** and creative approach has enabled us to provide a very high standard of service to all our clients.

Our **all encompassing** product range guarantees that we can provide solutions for all your needs. We have a complementary portfolio of products to suit all sectors, providing a proven one stop shop solution.

Our **service** and product portfolio is designed and specified to suit the individual needs of all of our clients, offering a bespoke solution where needed.

Quality Products – Quality Service – Quality Team

“

Textile House is the nerve centre of UK operations. Fronted by our administration block and manufacturing facility feeding two on site and one off site storage and distribution centres.

”

The synergy created by our close knit operation, enhanced by our one stop shop philosophy, means that our customers receive the most efficient and seamless service possible.

The Environment... and what it means to us

Davis and Moore Ltd have always held a **commitment to our environment**, indeed the very nature of what we do is inextricably linked to the recycling process.

We have asked ourselves 'what do we really do over and above for the good of ourselves and our customers - are we really committed to the environment simply by hanging our hat onto our recycling background?'

In 2021 we made a major financial investment to enable Textile House to be almost totally Energy self-sufficient through the commissioning of our solar panel project. This 85Kwh system allows Textile House, when fully charging, to be totally energy sufficient without the need to draw electricity from the Grid.

Of course, being located in Manchester, the Grid needs to support our usage during days when the

sun is obscured so we do not claim to be 100% Carbon free as yet but we hope our continuing initiatives will eventually help us realise that position.

We have also now started to feed small amounts of excess electricity generated back into the grid, increasing other users access to low carbon generated energy.

Davis and Moore actively promote the policy to reduce, recycle or re-use to try and lessen the impact on the environment of its activities. This practice is reflected in Company brochures and marketing materials.

What Davis & Moore have achieved so far...

We have been able to make savings through mindset changes with no cost to our customers, though we also have implemented the following:

- Installed low energy, movement-activated lighting, reduced plastic usage, optimised delivery routing techniques, removed and upgraded inefficient wiring systems, upgraded outdated electrical machinery, arranged reciprocal Customer pallet exchange, specified energy efficiency in any new vehicle purchases etc.
- Sourced raw materials from within the UK wherever possible and increased UK manufacturing capabilities.
- Minimised the use of energy, water and natural resources.
- Minimised waste through prevention, re-use and recycling.
- Arranged responsible, safe and legal disposal of any general waste produced.
- Sourced sustainable and recyclable packaging where possible.

These small steps we have taken have the effect of actively reducing our customers own carbon footprint each and every time they do business with us.

Visit www.davisandmoore.co.uk to watch our video

Help close the loop on UK textile recycling

Why export waste to the far east when we can recycle it in the UK and **reduce our carbon footprint**.

Recycled clothes currently travel over **20,000 nautical miles** before arriving back in the UK as textile wipers.

65% of clothing is still going to landfill

Est. 1981
INNOVATION • SUSTAINABILITY • SERVICE

Key benefits of UK manufacturing:

Reducing the risk in the supply chain – no uncertainty over exchange rates and product availability.

Reducing the carbon footprint – the fewer miles your products travel, the less harm they are doing to the planet.

Shorter lead times – eradicates long shipping times and delays at container ports.

Metal Detection

At Davis & Moore we pride ourselves on producing the best quality wipers in the market place. We have invested in a food grade inline metal detection system which guarantees the removal of metals to the following; 1mm iron, 1mm ferrous, 1mm non ferrous and 1.2mm 316 stainless steel.

No Metal Guarantee

If you see the Max the Magnet logo on the packaging you can have the peace of mind that the wiper has been metal detected.

Example of metal removed

Delivery

We aim to deliver goods to our customers on a next day/2 day service.

90% of orders are delivered by our own vehicle fleet to ensure you receive your goods when required, with minimum fuss.

Our vehicle fleet covers a large proportion of the UK

Our mission is to benefit the entire planet

New eco friendly product line made from 100% recycled raw materials with Ecolabel certification!

Utilising pre-used packaging and waste cardboard for the raw materials, this range combines **quality** with **environmental responsibility**, helping to reduce waste sent to landfill.

Did you know?

Recycling 9 million tonnes of paper and cardboard would avoid the creation of around 20 new landfill sites

It's a mission that benefits the entire planet, as well as ensuring the future is worth living for new generations.

Skin Safety Care Guide

Do:

- Clean your skin with the correct cleanser at the end of each day and before breaks
- Apply the appropriate creams if you have to work bare-handed
- Pay attention to thumbs, fingertips and between fingers
- Dry your hands well

Don't:

- Wear dirty or oily protective clothing
- Use a stronger cleanser than required for the soiling encountered
- Forget to wash your hands regularly
- Use soiled towels to dry your hands

Building a barrier, protecting skin

Easy dispensing for every job, a full **hand care system**

Backboards also available in multiples of 2 and 3 products, choose the best combination for the job

Packaging Materials

Environmentally Friendly & Sustainable Packaging

Our commitment to a more sustainable world

Everyone needs to **reduce** their **environmental impact** and to help you achieve that we've compiled a selection of products that meet one or more of the following criteria:

- Sustainable
- Recyclable
- Reusable
- Biodegradable
- Waste Reductive

Paper Kraft Tape

Paper tape that is 100% compostable, even the adhesive is biodegradable.

Size	Pack Qty
48mm x 50m	36
48mm x 100m	36

Water Activated Tape

Sturdy kraft paper with permanent adhesive, this prevents removal and creates tamper evidence. 100% Recyclability.

Size	Pack Qty
70mm x 100m	10

Kraft Paper Mailers

100% Paper - Made from mixed recycled and virgin paper. Kraft paper waffle padding provides extra strength for cushioning and protection. Fully compostable.

Size	Pack Qty
200 x 255mm	380
255 x 355mm	260
355 x 405mm	160

Paper Bubblewrap

Size	Pack Qty
350mm x 150m	Each

Honeycomb Kraft Wrap

It's honeycomb-like structure guarantees the same protection of fragile objects during transport as bubblewrap. Environmentally friendly alternative to bubble wrap.

Size	Pack Qty
395mm x 250m	Each
500mm x 250m	Each

Environmentally friendly
alternative to bubble wrap

No tape
required -
holds itself
together

Void Fill Paper

Paper void fill is a fast and efficient way to absorb empty space inside a cardboard box.

Size
300mm x 800m

Void Packing Paper

Ensures products are held in place during transit.

Size
762mm x 360m

Produces an environmentally friendly cushioning pad that offers superior protection, excellent shock absorbency, and ensures items are safe during transit and when in storage.

48mm	66mm	Low noise	Buff	36
48mm	66mm	Vinyl equivalent	Buff	36

Tape Dispenser

Suitable for all standard size tape.

Pack Qty
Each

What packing tape should I use?

Most packing tapes are made from one of the below materials:

Polypropylene is the **cheapest option** and the most widely used for general packing applications

Vinyl is a higher quality tape that offers greater **strength and resistance** to extremes of temperature. It is more suitable than polypropylene for cold store and freezer use.

Kraft paper is increasing in popularity due to its **excellent environmental credentials**. It has high visual appeal when used on corrugated cartons and is manufactured in natural, oyster and white kraft.

E-Tape

- Unique 150m length roll reduces downtime and wastage.
- 127% (2¼ times) more tape on the same size roll, therefore less storage space required.
- 56% reduction to waste.

Size	Length	Colour	Pack Qty
48mm	150m	Buff/Clear/White	36

Reduces downtime and wastage

Retractable blade for user safety

Brake system ensures consistent, smooth application

Heavy duty robust dispenser

Innovative silencer bar keeps noise to a minimum

Easy grip handle

See page 99 for Environmentally Friendly & Sustainable Packaging **Kraft Tape**

Getting the message across!
Custom Printed Tapes

Have your own logo, sales message or instruction printed on adhesive tape – get noticed every time you despatch a parcel
